Not only wine: Dimora Storica Giorni and the promise kept to the grandfather

Cantine Giorni's wine expands into a complete immersion in well-being.

Milano 11.16.2021 - Tasting wine is an **art**, and as such it deserves all the attention required. It is not enough to simply accompany it with good **food**, you also need to think about a suitable **location**. An elegant and refined place, perhaps far from the chaos of the city, to spend moments of real leisure. And if the experience really wants to be complete, pairing it with a **Spa** or a game of **Golf** are the last ingredients needed for a real escape from everyday life.

All this can be found in the novelty of the **Dimora Storica Giorni**, in **Pignola** (Pz) - Italy, an ancient eighteenth-century noble palace which has now been restored and transformed into an accommodation facility. From **November 19th** it is possible to book and stay in a completely renovated environment, in suites that keep their history but without escaping the luxuries of modernity. Inside the structure it is then possible to access the **Spa**, with a wide choice of treatments, and the nine-hole **Golf Club**, particularly surprising for its difficulty of play and challenging obstacles.

Pignola is in fact an excellent destination for those seeking the silence and peace of the **mountains**, to spend a few relaxing days in contact with nature. The area is particularly suitable for hiking trails on foot and on horseback, trekking, cycling thanks to the proximity of the **Sellata** area which offers tourist opportunities related to the practice of winter sports and nature trails in the nearby WWF Oasis of **Lake Pignola**.

Furthermore, the strong point of the structure will be the **restaurant**, also open to the public and not just to guests. With a cuisine that meets different Italian traditions, the main objective will be to put first choice local raw materials at the center for an excellent cuisine almost at 0 km. Here it will also be possible to access the wine tastings of the Cellar, such as the **Arioso** (2015), brut 100% chardonnay, or **Sciffrà** (2015), a cabernet sauvignon whose grapes grow exactly between the house and the golf course.

A dream that comes true for the owners, in particular for **Nicola Maria Patrone**, who with this new bet keeps the promise made to his grandfather Nicola as a boy, when he told him "*Grandfather, I promise you that this tiny vineyard will become huge and beautiful*". Together with his brother Giovanni and his cousins Giovanna and Ornella - whose acronym is *Giorni* - he transformed the vineyard into one of the most

important wineries in the area, now aiming even higher with Palazzo Lombardi, in which his grandfather was the factotum as a young man.

ABOUT CANTINA GIORNI

Cantina Giorni is today a family-run business run by four young cousins who are passionate about their land and its fruits. The Cabernet Sauvignon vineyards processed are located in the mountain area of Pignola, in the province of Potenza, in the Appennino Lucano National Park. At a height of 850 meters above sea level, there are in fact about 5 cultivated hectares from which the red wines Sciffrà, Orneto and Plinia del Calace are born. The company also owns another production area, located in the eastern part of Friuli on the border with Slovenia, which is instead the cradle of white wines. Here, from a hilly expanse of just over 3 hectares, Petrucco, 100% Chardonnay, 100% Tora, Sauvignon blanc and Arioso come to life, a vintage brut sparkling wine obtained with the Champenoise method, a blend of Chardonnay and Pinot bianco grapes.

The history of Cantina Giorni is a continuous enrichment of experiences and projects to be carried out with commitment, passion and sacrifices, for which day after day the pages of his book increase and are colored with more and more new shades.
